MAKING STRIDES IN LIFE

“Hard conversations are critical to success at work. These moms were so willing to practice this skill and were really brave as they worked together to make big strides in life. If you’ve experienced a lifetime of poverty, it can feel like that’s the way it will always be. But they pushed forward, and they are changing their stories by doing this program.

“The tools I found at Climb helped me think brighter about my future. We grew not only for ourselves but also for our children.”

— Scilynn, Program Participant

The moms spent a lot of time discussing work readiness such as navigating conflict, workplace boundaries, and interview practice. The medical industry will benefit so much from their dedication, intelligence, and compassion!

— Grace Torres, Program Director

Certified Nursing Assistant training culminated in testing and licensing with the Wyoming State Board of Nursing. Also included administrative training in computer skills and data entry.
